

DESCRIPTION

The SESRV05-4H is a dual USB port protection array that features ultra low capacitance. This device can be used in applications such as video cards, SMART phones, Gigabit Ethernet and other computer interfaces. Designed for ESD protection, the SESRV05-4H can clamp the effects of electrical fast transients on the power bus.

The SESRV05-4H combines 8 low capacitance steering diodes for up to four individual data or transmission lines and one TVS diode for power bus protection. This device is available in the space-saving SOT-2-3-6 package configuration, which minimizes lead inductance to prevent overshoot voltages during high ESD current events. The SESRV05-4H meets the IEC 61000-4-2, 61000-4-2 and 61000-4-5 requirements.
